SUMMARY

Motivated B.Tech Computer Science (AI & ML) student with a growing interest in Artificial Intelligence, Machine Learning, Full-Stack Web Development, and Data Structures & Algorithms. Actively strengthening core programming and problem-solving skills through hands-on practice and academic projects. Demonstrated strong initiative by actively applying theoretical knowledge to real-world challenges through collaborative projects, seeking mentorship, and engaging in hands-on learning experiences.

TECHNICAL SKILLS

- **Languages :** C, Python(, Java(Basics), MYSQL, JavaScript (Basics)
 - **Web & Frameworks:** HTML, CSS
 - **Developer Tools:** VSCode, CodeBlocks, JupyterNotebook, Eclipse **Operating**
 - **System:** Windows
 - **Areas of Interest:** Machine Learning, Full Stack Web Development, Problem Solving, Competitive Programming.
- Leetcode Contest Rating:** 1,458

EDUCATION

CMR College of Engineering & Technology • B.Tech in CSE AI & ML (8.93 CGPA)	September 2024 - Present
Intermediate Sri Chaitanya Junior Kalasala	May 2022 - May 2024
• MPC (94.9%) Brahmam Talent High School •	June 2021 - May 2022
CGPA - 9.8	

PROJECTS

Health Mitra (Healthcare Management Website)

- Developed a healthcare management platform to securely store patients' medical reports, enabling doctors to request and analyze records using the LOC method to predict possible diseases.
- Integrated medicine reminder features to support proper treatment adherence, contributing to improved patient outcomes

College Management System | C, File Handling, Data Structures

- Developed a console-based system to manage student records as part of an academic project.
- Implemented insert, search, update, delete, and count operations using stacks and singly linked lists.

Hospital Management System | C, File Handling, Data Structures

- Built a supplier management module to store and manage medical supplier details. •
- Implemented operations using file handling for efficient record management.

FixTrack | Web application

- Developed a basic issue tracking system to report, track, and update issue status. •
- Implemented structured logic to manage issue records and workflow efficiently.

Spam Email Classifier | Python

- Built an Email Spam Classifier using machine learning to classify emails as spam or not spam based on structured features. Trained a classification model to achieve accurate detection and improve email filtering efficiency.

Credit Card Fraud Detection | Python

- Built a Credit Card Fraud Detection system using machine learning to identify suspicious transactions in real time using Random Forest. Improved detection accuracy and helped reduce fraud risk through faster, reliable fraud identification.

CERTIFICATIONS

- Cisco Networking Academy
[Certificate](#)
- Infosys Spring Board
[Certificates](#)
- Sales Force Agent Specialist Certificate:
[SalesForce Certificate](#)

EXTRA CURRICULAR ACTIVITIES

Languages: English, French, Telugu, Hindi.

- Engaged in creative expression activities, such as leading group presentations and collaborative projects, that strengthened communication, critical thinking, presentation, and leadership skills.
- Actively participated in various essay writing competitions, workshops, and seminars at the college level, contributing insights and engaging in collaborative discussions.
